

EXAM **V**ISION™

Changing Your Temple Tips

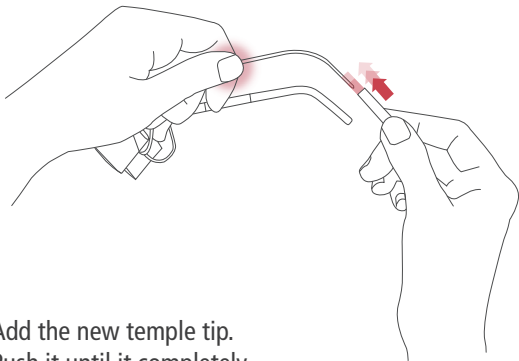

Changing your temple tips is **easy**,
but you may need to pull or push quite hard.

A drop of soap can help.

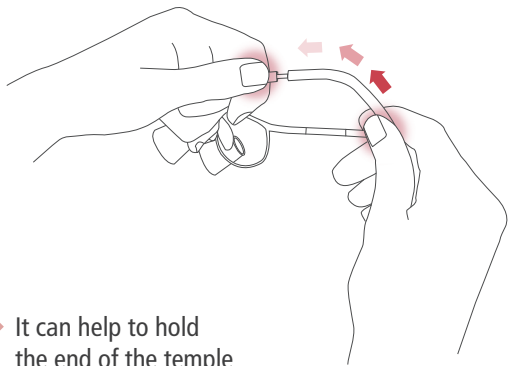

Take care not to bend the loupe frame
or scratch the optics.

- 1 ▶ Take the old temple tip off.
Twist slightly to make the
temple tip release

- 2** ▶ Add the new temple tip.
Push it until it completely
covers the thin part

- 3**▶ It can help to hold the end of the temple tip as shown
